Vectra today announced it ranked 116th on [Deloitte's Technology Fast 500™](#), a ranking of the 500 fastest growing technology, media, telecommunications, life sciences and energy tech companies in North America. Vectra grew 1,099 percent during this period.

Vectra CFO Howie Shohet, credits the company's growth to how its Cognito platform enables enterprise security teams to detect the behaviors of cyberattackers that have evaded other security controls to prevent loss of critical data.

"We are honored to be recognized on Deloitte's 2018 Technology Fast 500 list," said Shohet. "This recognition validates our customers' adoption of AI to address the requirement to automate real-time cyberattack detection and empower threat hunting."

"Congratulations to the Deloitte 2018 Technology Fast 500 winners on this impressive achievement," said [Sandra Shirai](#), vice chairman, Deloitte LLP, and U.S. technology, media and telecommunications leader. "These companies are innovators who have converted their disruptive ideas into products, services and experiences that can captivate new customers and drive remarkable growth."

"Software, which accounts for nearly two of every three companies on the list, continues to produce some of the most exciting technologies of the 21st century, including innovations in artificial intelligence, predictive analytics and robotics," said [Mohana Dissanayake](#), partner, Deloitte & Touche LLP, and industry leader for technology, media and telecommunications, within Deloitte's audit and assurance practice. "This year's ranking demonstrates what is likely a national phenomenon, where many companies from all parts of America are transforming the way we do business by combining breakthrough research and development, entrepreneurship and rapid growth."

Overall, 2018 Technology Fast 500™ companies achieved revenue growth ranging from 143 percent to 77,260 percent from 2014 to 2017, with median growth of 412 percent.

About Deloitte's 2018 Technology Fast 500™

Deloitte's Technology Fast 500 provides a ranking of the fastest growing technology, media, telecommunications, life sciences and energy tech companies — both public and private — in North America. Technology Fast 500 award winners are selected based on percentage fiscal year revenue growth from 2014 to 2017.

In order to be eligible for Technology Fast 500 recognition, companies must own proprietary intellectual property or technology that is sold to customers in products that contribute to a majority of the company's operating revenues. Companies must have base-year operating revenues of at least \$50,000 USD, and current-year operating revenues of at least \$5 million USD. Additionally, companies must be in business for a minimum of four years and be headquartered within North America.
